

# LAKESIDE SEEDS Catalog

## 2021 – 2022

Hello!

Thank you so much for your past purchase(s)! Seed processing is now complete and our 2021 – 2022 catalog of available seeds is here! 2021 was once again an interesting year. It started out with a drought for us until June and then finally rain came, but this made for a very poor spring crop of seeds. But, after all was said and done, we had a nice set of seeds to collect! We hope you find this years selection interesting!

PLEASE NOTE: You can still purchase some of our items on the Ebay store, but MANY are not listed there. **Only about 1/3 of our items are listed on Ebay!** In addition, because of Ebay's excessive fees, the number of seeds offered there are less, versus directly ordering from us in the catalog. So, the best value, and perhaps easiest for both of us, is to simply email us your order directly and we can send you a direct PayPal invoice.

Note that all seeds are “first come, first served,” so orders are filled on a basis of when they are received – so get your orders in soon to prevent items being sold out! **To see images of each flower, please visit the “Catalog Pictures” link below!** All seed packets are \$2. Shipping is a standard \$3.50 - \$4.50, depending on location (the cheapest a padded envelope can be sent), for up to about 25 packets. If you want more than 25 packets, it may increase shipping slightly. Please note that if the USPS changes their shipping prices for a standard bubble envelope, then shipping cost will likely increase to match that.

Please let us know if you have any questions! Here are all the links you will need:

Catalog Pictures: <http://lakesideendeavors.com/growwild/cat/21/cat2122.htm>

Ebay Store: <https://www.ebay.com/str/lakesideseeds>

Our Facebook Page: <https://www.facebook.com/lakesideseeds/>

Our Email: [ausmusranch@gmail.com](mailto:ausmusranch@gmail.com)

Finally, if you have been pleased with the seeds you received from us, **please let your family, friends and gardening buddies know about us!**

Thank you!

Jeff and Kim,

Lakeside Seeds

### **Guide to the Catalog**

**Latin Name** – shows the Latin name of the plant

**Common Name** – shows one of the common names of the plant

**#** - shows the approximate number of seeds per packet

**Avail** – shows availability:

☉ indicates normal availability;

L indicates limited number of seed is available;

VL indicates a very limited number of seed is available;

2018 indicates no new crop this year, but last year's is still available, if desired;

**Dur** – shows duration of plant:

P – perennial, the plant lives 3+ years (usually much more)

A – annual, the plant lives only one year, or one growing season

B – biennial, the plant comes up, persists through a winter, and then dies after blooming

Other Symbols:

☀ - grows in full sun

☁ - grows in part sun

☀ - grows in full shade

🍷 - is said to be edible, in part or in full

💧 - prefers moist soil

☠ - parts or all of the plant are poisonous

🐝 - plants is a hummingbird favorite

🦋 - plant attracts butterflies

🐝 - plant attracts bees

 - plant has medicinal or herbal applications

### **GROWING INSTRUCTIONS**

The best time to plant wildflower seeds is either in the fall, winter, or early spring. Wildflowers are different from garden annuals and vegetables - wildflowers are very tough, so they can handle the cold, in fact, some even require a “cold period” to break seed dormancy.

If you wish, you can plant the seeds in spring. And you can even plant them in the fall... around September/October, and they will either come up then, and overwinter as a tiny plant, or they will come up in March/April. If you plant in the spring, it should be early, if you wait too long in the spring, it will be too hot, and then you'll need to water the seeds/seedlings frequently so they don't die while they are getting established. But, if you plant them as soon as the soil is not frozen, they should be able to get growing and become established before scorching summer heat. If you live in an area (like the South) where it gets hot very quickly in the spring, then fall/winter may be your best time to plant. Some wildflowers even NEED a cold period, to break their dormancy so they germinate! Most wild flower nurseries recommend fall planting as the best time to plant seeds.

Depending on how you have things set up for your garden, you can either mix all the seeds yourself and spread them, or you can do what we normally advise people to do, which is to plant them as individual species, rather than scattering them all together. The individual method gives you better control over the area, and also allows you to monitor what comes up. I would advise that you scatter each individual species in an area that is 3 inches by 3 inches, or if you have more area available, then use a 10 inch by 10 inch area for each species. Take about... say 15 - 20 seeds of 1 species, and spread it in an area... and just press them down into the soil slightly.... and then, move a few inches over, and do the same with the 2nd species... and then, the same with the 3rd... and so on. Mark where each one is... at least with a stick, if nothing else, and probably mark what each one is, too. (I usually make maps of my gardens on paper, but you could also just number them or something.) I also advise not to use the whole packet at one time - these seeds are fresh, from just this past season, so germination rate should be high. So, I would use the seeds sparingly, and save the excess seed (in the fridge will keep them freshest) and then, if you don't have luck the first time you try planting, you can try again, or try them in a new area!

# Special Announcement!

We have some exciting news that we are now ready to share (and that we gave you a preview of earlier this season if you got our email) – we have started a new website designed to help people ID wildflowers in their yards, gardens and that they may encounter. We also have, and are working on new ID charts for various groups of difficult species, including asters and goldenrods.

Please check out the website when you get a chance! The link is: <http://wildflowerID.info>

The website is designed to help you find the flowers by color, location or name. We are still working on getting all of that functional. Right now we have pages and images loaded for over half of the 1,000 species listed, and we are working on more all the time. We are working on it! There may be some broken links now, but once the images and pages are finished being loaded, they will all work. Please know that as the site is in progress, we are continually taking new photos of new species and parts of currently listed species that will be added to the site also – so we are always working on it!

We gladly welcome and **very much appreciate** any donations you may be able to make to support our work on the website! Thank you!!!

\* This is an Asclepias species. It is highly possible it is A. exaltata, but it could also be A. variegata. If you do not want an unknown species, please don't order this.

& At the time the catalog is made, these seeds have still not been collected as they are not ripe yet. It is expected they will be available soon!

Items that are **bold** are new to the catalog for this season. Some have been offered in the past, but they are bold if new, or if not offered last season.

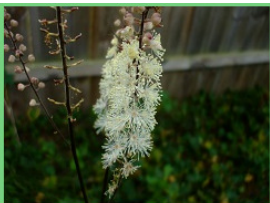

1. *Achillea millefolium*

2. *Actaea pachypoda*

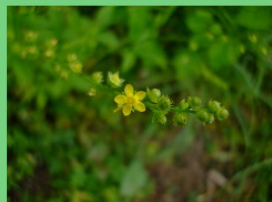

3. *Actaea rubifolia*

4. *Actaea rubra*

5. *Agastache foeniculum*

6. *Agrimonia gryposepala*

7. *Agrimonia parviflora*

8. *Agrimonia striata*

9. *Aletris farinosa*

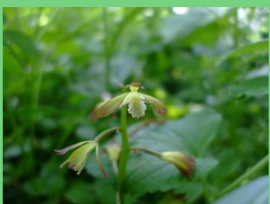

10. *Allium cernuum*

11. *Amsonia tabernaemontana*

12. *Anemone cylindrica*

13. *Aplectrum hyemale*

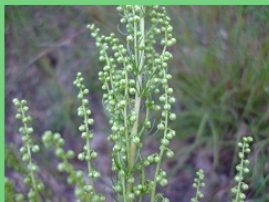

14. *Aquilegia canadensis*

15. *Arabis glabra*

16. *Arisaema triphyllum*

17. *Artemisia campestris*

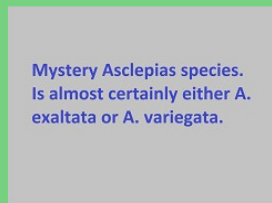

18. *Asclepias amplexicaulis*

19. *Asclepias exaltata*

20. *Asclepias incarnata*

21. *Asclepias* sp.

22. *Asclepias syriaca*

23. *Asclepias tuberosa*

24. *Asclepias verticillata*

25. *Bidens frondosa*

26. *Cacia muhlenbergii*

27. *Cacia suaveolens*

28. *Calla palustris*

29. *Callirhoe involucrata*

30. *Calopogon tuberosus*

Mystery *Asclepias* species.  
Is almost certainly either *A.*  
*exaltata* or *A. variegata*.

31. *Campsis radicans*

32. *Cassia fasciculata*

33. *Chamaedaphne calyculata*

34. *Chelone glabra*

35. *Chenopodium album*

36. *Chrysopsis gossypina*

37. *Chrysopsis villosa*

38. *Circaea alpina*

39. *Circaea lutetiana*

40. *Claytonia caroliniana*

41. *Claytonia virginica*

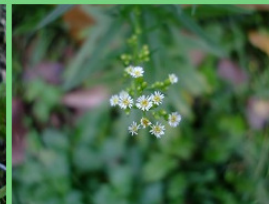

42. *Clematis virginiana*

43. *Clinopodium vulgare*

44. *Conopholis americana*

45. *Conyza canadensis*

46. *Coptis trifolia*

47. *Coreopsis delphinifolia*

48. *Coreopsis pubescens*

49. *Coreopsis tripteris*

50. *Cornus canadensis*

51. *Cypripedium acaule*

52. *Delphinium exaltatum*

53. *Desmanthus illinoensis*

54. *Doellengeria umbellata*

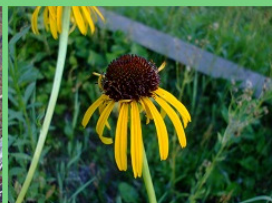

55. *Drosera filiformis*

56. *Drosera intermedia*

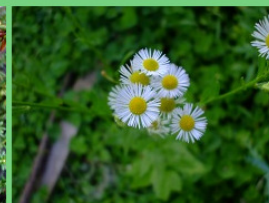

57. *Drosera rotundifolia*

58. *Echinacea paradoxa*

59. *Empetrum nigrum*

60. *Erigeron annuus*

61. *Erigeron philadelphicus*

62. *Eryngium yuccifolium*

63. *Eupatorium altissimum*

64. *Eupatorium perfoliatum*

65. *Eupatorium purpureum*

66. *Eurybia macrophylla*

67. *Euthamia graminifolia*

68. *Fallopia cilinodis*

69. *Galium aparine*

70. *Galium pilosum*

71. *Gaylussacia baccata*

72. *Gentiana andrewsii*

73. *Gentiana clausa*

74. *Gentianopsis crinita*

75. *Geranium carolinianum*

76. *Geranium robertianum*

77. *Geum aleppicum*

78. *Geum canadense*

79. *Geum laciniatum*

80. *Geum rivale*

81. *Goodyera pubescens*

82. *Helenium autumnale*

83. *Helianthus maximiliani*

84. *Helianthus mollis*

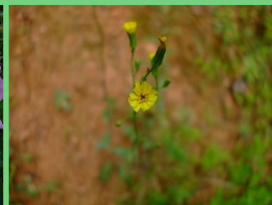

85. *Hibiscus grandiflorus*

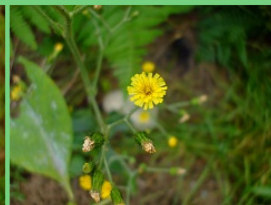

86. *Hibiscus lasiocarpus*

87. *Hibiscus palustris*

88. *Hieracium gronovii*

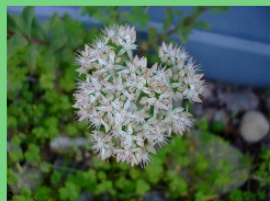

89. *Hieracium scabrum*

90. *Hieracium umbellatum*

91. *Hylotelephium telephiodes*

92. *Hypericum punctatum*

93. *Ilex mucronata*

94. *Ilex verticillata*

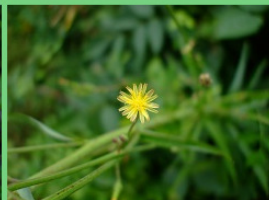

95. *Iris versicolor*

96. *Kalmia angustifolia*

97. *Kalmia polifolia*

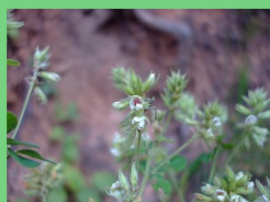

98. *Lactuca canadensis*

99. *Lathyrus japonicus*

100. *Lespedeza capitata*

101. *Lespedeza hirta*

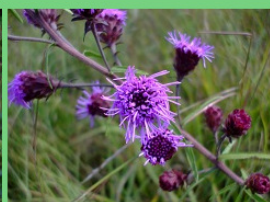

102. *Liatris aspera*

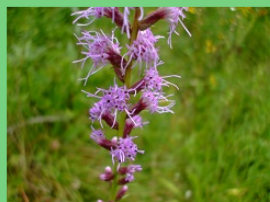

103. *Liatris cylindracea*

104. *Liatris hirsuta*

105. *Liatris scariosa*

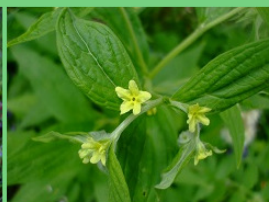

106. *Liatris spicata*

107. *Lilium michiganense*

108. *Liparis loeselii*

109. *Lithospermum latifolium*

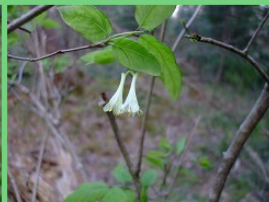

110. *Lobelia inflata*

111. *Lobelia kalmii*

112. *Lobelia siphilitica*

113. *Lonicera canadensis*

114. *Lonicera dioica*

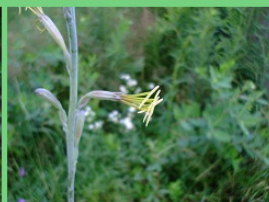

115. *Ludwigia alternifolia*

116. *Lupinus perennis*

117. *Malaxis monophyllus*

118. *Manfreda virginica*

119. *Matricaria discoidea*

120. *Mirabilis nyctaginea*

121. *Mitella diphylla*

122. *Mitella nuda*

123. *Monarda bradburiana*

124. *Monarda fistulosa*

125. *Oenothera berlandieri*

126. *Oenothera fruticosa*

127. *Oligoneuron album*

128. *Oxalis dillenii*

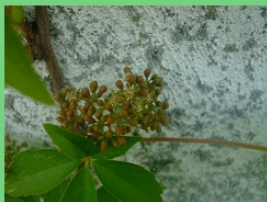

129. *Parthenium auriculatum*

130. *Parthenium integrifolium*

131. *Parthenocissus inserta*

132. *Parthenocissus quinquefolia*

133. *Penthorum sedoides*

134. *Phlox paniculata*

135. *Phytolacca americana*

136. *Platanthera aquilonis*

137. *Platanthera blephariglottis*

138. *Platanthera clavellata*

139. *Platanthera flava*

140. *Pogonia ophioglossoides*

141. *Polygonum virginianum*

142. *Prunella vulgaris*

143. *Ratibida pinnata*

144. *Rhus copallinum*

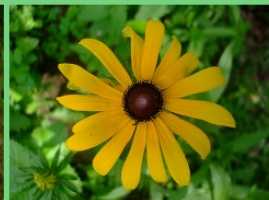

145. *Rhus typhina*

146. *Rosa carolina*

147. *Rosa palustris*

148. *Rudbeckia hirta*

149. *Rudbeckia subtomentosa*

150. *Rudbeckia triloba*

151. *Salvia azurea*

152. *Salvia lyrata*

153. *Sarracenia purpurea*

154. *Scrophularia lanceolata*

155. *Sibbaldiopsis tridentata*

156. *Sida hermaphrodita*

157. *Silene stellata*

158. *Silphium glutinosum*

159. *Silphium integrifolium*

160. *Silphium perfoliatum*

161. *Solanum ptychanthum*

162. *Solidago altissima*

163. *Solidago caesia*

164. *Solidago drummondii*

165. *Solidago flexicaulis*

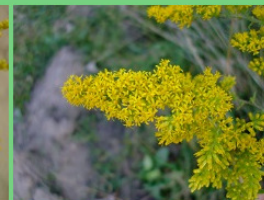

166. *Solidago hispida*

167. *Solidago jejunifolia*

168. *Solidago juncea*

169. *Solidago nemoralis*

170. *Solidago ohioensis*

171. *Solidago riddellii*

172. *Solidago rugosa*

173. *Solidago sempervirens*

174. *Solidago uliginosa*

175. *Spiranthes cernua*

176. *Symphyotrichum boreale*

177. *Symphyotrichum ericoides*

178. *Symphyotrichum laeve*

179. *Symphyotrichum lanceolatum*

180. *Symphyotrichum novae-angliae*

181. *Symphyotrichum oolentangiense*

182. *Symphyotrichum patens*

183. *Symphyotrichum pilosum*

184. *Symphyotrichum praealtum*

185. *Symphyotrichum puniceum*

186. *Symphyotrichum racemosum*

187. *Symphyotrichum subspicatum*

188. *Symphyotrichum turbinellum*

189. *Tipularia discolor*

190. *Trientalis borealis*

191. *Trillium flexipes*

192. *Trillium grandiflorum*

193. *Trillium luteum*

194. *Vaccinium pallidum*

195. *Verbena hastata*

196. *Verbena urticifolia*

197. *Verbesina alternifolia*

198. *Verbesina helianthoides*

199. *Vernonia arkansana*

200. *Veronicastrium virginicum*

201. *Viola fimbriatula*

202. *Viola lanceolata*

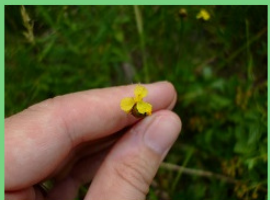

203. *Viola sororia*

204. *Vitis aestivalis*

205. *Vitis riparia*

206. *Xyris torta*

207. *Yucca flaccida*

## **Special Order Only**

Some species are difficult to collect, or we only collect them in small quantities, not enough to be in the catalog. And some species we have carried in the past, but were discontinued from the catalog, due to lack of interest.

This year, we are doing something a bit different with our special orders. Since we now have the wildflower ID website, which has an A – Z list of many plants, instead of maintaining a list of discontinued species, we are going to direct you to our A – Z site on the wildflower ID website (<http://wildflowerID.info/az.htm>) If you see something on there that you'd like to have seeds of but that isn't in the catalog, please let us know and we will let you know if we can get it.

Not everything on the list is something we are able to get seeds of in any given year, or perhaps at all – some were photographed on vacation, or are rare, etc. But, many of them **are** available for us to collect. So, let us know if you see something you want! Special order packets will be available for \$3.50 per packet, instead of the normal \$2, and will have to be collected once seeds become available throughout the season – so, you will let us know what you want, and we will let you know once it becomes available.

Thank you for being a great customer!

If you have any questions, please let us know! ([ausmusranch@gmail.com](mailto:ausmusranch@gmail.com))

If you see something you like, but it is sold out, be sure to let us know. We can let you know as soon as it is back in stock.

If there is something you would like to see us carry, let us know and we will try to grow it to get seeds to offer in the future, if it is something we can grow here in zone 6b.

**PLEASE SHARE OUR CATALOG WITH OTHERS!!! :)**

Thanks again!
